Appendices

- Appendix A: Survey Maps
- Appendix B: Subdivision information
- Appendix C: Properties Recommended for Intensive Level Research
- Appendix D: Builders and Developers of Yalecrest
- Appendix E: Historic Building Report
- Appendix F: Architectural Survey Data Sheets
- Appendix G: Digital Contact Sheets

Project Objectives

The purpose of this Standard Reconnaissance Level survey was to document all of the principal structures in the Yalecrest area of Salt Lake City, to update the information files in the statewide database of information on cultural resources in Utah¹ created and maintained by the Utah State Historic Preservation Office (SHPO), and to provide recommendations for use by Salt Lake City in preservation efforts within the surveyed area. All properties surveyed were evaluated to determine their eligibility for the National Register of Historic Places, their current physical condition and their contributing or noncontributing status. This documentation provides a written and photographic record of the historic resources that may be demolished or altered in the future as well as to promote preservation of the buildings and resources documented. A Reconnaissance Level Survey also identifies buildings or districts that may potentially be eligible for nomination to the National Register of Historic Places.

Survey Boundaries

The boundaries of the Yalecrest survey area were determined by the Salt Lake City Planning Division. The borders of the survey area are the east side of 1300 East, the north side of 1300 South, the west side of 1900 East, and the south side of Sunnyside Avenue (840 South) and 800 South on the north. The Gilmer Park and the East Side National Register Historic Districts are adjacent to the survey area on the west. The historic southern boundary of Salt Lake City is now 900 South. A total of 1,487 primary structures or resources were evaluated and documented in the area.

Outline History of the Yalecrest Neighborhood

The Big Field Survey and Agricultural Use (1849-1909)

Salt Lake City was a planned city, laid out in a grid according to the "Plat of the City of Zion," a town plan proposed by Joseph Smith, founder of the Church of Jesus Christ of the Latter-day Saints (Mormon or LDS), and later used for many Mormon settlements throughout the Utah territory. Within a year of the arrival of the first group of settlers in 1847, Salt Lake City had grown to 5,000 inhabitants

Public buildings were in the center of the city, surrounded by residential lots and farmland to the south and west. The Big Field Survey in 1848 divided the land to the south of the Salt Lake City settlement (900 South today) into five and ten acre plots to be used for farming for the "mechanics and artisans" of the city.² The Yalecrest survey area is located on the northeastern section of land that was initially set apart as Five-Acre Plat "C" of the Big Field Survey.³ The land was divided into 100-acre blocks, each of which was again divided into 20 lots of 5 acres each. Yalecrest occupies Blocks 28, 29, and 30. The original blocks are bordered by the major north-south streets of the survey area: 1300, 1500, 1700 and 1900 East and the east-west streets of 900 and 1300 South.

¹ The Utah Historic Sites Database.

² The area north of 2100 South was Five-Acre Plat "A" and the area south was Ten-Acre Plat .

³The majority of Yalecrest with the exception of strips along the north and west sides are part of Five Acre Plat "C."

The property was distributed by the LDS church authorities by lot for use in raising crops and farming. Dividing the plots for land speculation was discouraged. Birdseye maps of Salt Lake City in 1875 show no development in the southeast section of the city beyond 1000 East or 900 South. The earliest identified residents in the Yalecrest area begin to appear in the 1870s.⁴ A ten-acre plot belonging to Gutliffe Beck was located near Yalecrest between 1700 and 1800 East. His early 1870s adobe farmstead was located near the intersection of Yalecrest Avenue and 1700 East. The property was later used as a dairy farm. Paul Schettler's farm, situated near the intersection of 1900 East and Herbert Avenue, had crops that included silk worms and mulberry orchards. David Lawrence had twenty acres of alfalfa located to the south of the Schettlers. On Sunnyside between 1800 and 1900 East Jim Carrigan built a house c. 1876 and farmed forty-five acres. A one-legged man named Wheeler lived at what is now 1372 Harvard and got his culinary water from Red Butte Creek. No remnants of these early homes are known to remain.

Streetcars, Subdivision Development and Automobiles (1910-1939)

A number of factors contributed to the Yalecrest area development in the early twentieth century. The population of Salt Lake City increased rapidly at the turn of the century, almost doubling from 1900 to 1910.⁵ Air pollution from coal-burning furnaces as well as early industry in the valley added to the smoke-filled air of Salt Lake City, particularly in the winter. Properties on the east bench above the steep grade that flattens at 1300 East above the smoky air of the city began to look attractive for residential development. Land developers from Utah and out-of-state sensed economic opportunity in the potential urban growth, began to purchase land on the east bench, and filed subdivisions with the county. Early subdivision advertising touted the clean air of the bench, above the smoke of the valley.

Transportation options made the Yalecrest area easily accessible to the downtown area. The primary means of transportation in the early part of this era was the streetcar and the line along 1500 East serviced Yalecrest commuters to downtown Salt Lake City. The streetcars serving the Yalecrest area traveled from downtown to 1300 East in front of East High, south along 900 South to 1500 East, then south to Sugar House and the prison. By 1923 there were 217 streetcars and over 100,000 passengers a day in Salt Lake City. At the same time, Salt Lake County had 21,000 private cars registered and garages became a popular addition to earlier houses. Ridership on the streetcars began to decline in the later 1920s in spite of a total of 152 miles of streetcar tracks in 1926. A trial gasoline powered bus⁶ began a route along 1300 East in 1933. Buses soon predominated in public transportation.

Pavement of some of the streets in Yalecrest occurred soon after construction of the first houses. The earliest street pavement project began with Yale Avenue from 1300 to 1500 East in 1913-1914. That was soon followed in 1915 by Michigan (1500 East to LeGrande), LeGrande (900 South to Michigan), 900 South (1300 East to 1500 East), and 1500 East (900 South to Yale). Subsequently in 1916, 1500 East (Yale to 1300 South) and 1300 East (900 South to 1700 South) were paved. Developers usually provided the sidewalks, curbs and gutters as they began to lay out the subdivisions and the streets were paved by the city and funded through assessments of the

⁴ All information on the 19th c. settlers is from the Daughters of Utah Pioneers, *Yale Camp Locality History* (1933), p.20.

⁵ 53,531 in 1900 and 92,777 in 1910.

⁶ The first in the nation to have the engine in the rear.

adjacent properties.⁷ A significant number of Yalecrest streets were paved in the 1920s with a few following in the 1930s. Yale (1700 to 1800 East), Military Drive, and Yalecrest were paved in 1926. Herbert (1700 to 1800 East) got pavement in 1927 and Yale (1800 to 1900 East), Harvard (1600 to 1800 East), and Princeton (1500-1700 East) in 1928.

Developers and builders played a primarily role in the growth of Yalecrest. They laid out the potential lots, registered subdivisions with the county, arranged for sidewalks, curbs and gutters, put together financing, involved real estate people, publicized the opening of the subdivisions in the newspapers, often built the speculative houses, frequently serving as contractors or builders for custom houses, and in many cases, lived in the subdivision themselves. Most of the builders were active on numerous streets in the area.⁸

There were 22 subdivisions platted in Yalecrest from 1911 to 1938. Colonial Heights, in the southeast corner of Yalecrest, was platted in January of 1911⁹, but little was built there until the 1930s. Its initial street names, Kelsey, Edith, and Hampton, were later changed to Princeton, Harvard, and Laird. Many builders were involved in construction there with N.L. Herrick, the Herrick Building Company, L.J. Bowers and A. Toronto building speculative houses in Colonial Heights. Albert Toronto was the owner and operator of Toronto & Company, a Salt Lake real estate, insurance and home building firm. He was a Salt Lake native, educated in the local schools and active in building in the 1920s and 1930s.

Douglas Park was laid out across the northern section of the study area¹⁰ later in 1911 by the W.E. Hubbard Investment Company. Hubbard was a medical doctor from Chicago who came to Utah via Los Angeles and became involved in real estate sales, investments and mining. He was a prolific businessman and by 1919 had laid out, developed and sold 41 subdivisions. Douglas Park Amended and Douglas Park 2nd Addition comprise a total of 1158 building lots in an area that includes the ravine surrounding Red Butte Creek and another gully that runs between Michigan and 900 South between 1300 and 1500 East. Initial development consisted of rather large, geographically dispersed bungalows on the western section, overlooking the city.¹¹ Some of the earliest houses in the area are the scattered bungalows on 900 South, 1400 East and 1500 East. Construction of houses in the Douglas Parks took place over a forty year period from the teens through in early 1950s. Speculative houses were constructed by Samuel Campbell, Anderson Building (Anderson Lumber Company), Doxey-Layton, Capitol Building Company, Rogers Building Company, and H. (Henning) Henderson, among others. Henning Henderson was born in Denmark in 1887 and worked as a building contractor in Salt Lake City from 1913 until his retirement in 1950.

Several architects designed houses in the area: J.C. Craig designed the two-story Prairie house at 1327 S. Michigan c. 1915 and Lorenzo S. Young who designed the Bonneville Ward and Stake House in 1950 most likely designed his own house at 1608 E. Michigan c. 1935. Glen A. Finlayson built his unusual Art Deco house at 973 Diestal Road in 1936. He was a Utah native, worked as an architectural engineer for American Oil and Utah Oil for 33 years, and lived in the house with his wife, Mina, until his death in 1969. Slack Winburn designed a house at 979 South

⁷ E.g. Harvard Avenue from 1300 to 1500 East, Normandie Circle, and 1400 East from Harvard to Princeton were paved by a city contractor, Christenson, Jacob and Gardner, in 1926. The city paid \$772.31 and the adjacent parcels were assessed \$24,623.88. Today that construction would cost \$415,000.

⁸ See Yalecrest Builders appendix.

⁹ Fremont Heights dates from 1892 but the small portion of it within Yalecrest has only out-of-period buildings.

¹⁰ Roughly the area to the north of Michigan Avenue.

¹¹ Dated photographs from the Shipler Collection at the Utah History Reference Center show scattered bungalows as Douglas Park was initially under construction in the early teens (1912) although the earliest known building permit has a date of 1915.

1300 East in c. 1922. Winburn studied architecture at the Ecole des Beaux Arts et des Sciences Industrielles at Toulouse, France, following his service there in World War I. He moved to Salt Lake City in 1920 and was active designing many buildings in Utah and the Intermountain West including the Sigma Nu fraternity house and Bailif Hall at the University of Utah and a number of apartment buildings in Salt Lake City. Some architects also served as builders. Fred J. Swaner drew the plans for and supervised the building of a fashionable clinker brick bungalow at 871 South 1400 East in 1915 for William R. Hainey who emigrated to Salt Lake City from Grafton, Nebraska, to work for the Hubbard Investment Company, owners of Douglas Park. Philip Biesinger advertised in 1928 a model home at 1757 Herbert Avenue that he designed and built.

As population moved into the area, a school, LDS churches, and a park were built to accommodate them. Uintah School was constructed in 1915 to support the growing elementary school age population of the East Bench. It was built encircled by vacant land but was soon filled to capacity with the rapid growth of the surrounding residential sections. The school was even enlarged in 1927. Two LDS ward chapels were built in this era. The 1925 red brick Colonial Revival Yale LDS Ward Chapel at 1431 Gilmer Drive was designed by Taylor Woolley at Evans and Woolley and built by Gaskell Romney. Both Woolley and Romney were residents of Yalecrest. The Art Deco Yalecrest Ward Chapel at 1035 South 1800 East was built in 1936 of exposed reinforced concrete. Miller Park (discussed above) follows the course of Red Butte Creek on both sides of its ravine and originally extended from 900 South to 1500 East. The entrance on the east side of 1500 East and Bonneview Drive is marked with a sandstone bench, columns and a brass commemorative plaque.

The Ashton-Jenkins Company, one of the largest real estate and mortgage banking companies in Utah, recorded three subdivisions in the survey area: Yale Park in 1913, Yale Park Plat A in 1915 and Upper Yale Park in 1924. The Yale Parks were heavily promoted in the newspapers and attracted prominent homeowners. The Frank Lloyd Wright-trained Utah architect, Taylor A. Woolley, designed the Prairie style house at 1408 Yale Avenue for William W. and Leda Rawlins Ray, the U.S. District Attorney for Utah. Woolley's firm, Woolley and Evans, designed the Colonial Revival Yale LDS Ward Chapel built in 1925 by Gaskell Romney on 1431 Gilmer Avenue.

Several generations of the Ashton family were major developers in Salt Lake City and involved in real estate, development, construction, architecture and allied occupations. Edward T. Ashton and his brother of George S. were sons of Edward Ashton, a cut stone contractor who supplied stone for many church and public buildings in Utah, and were partners in the firm of Ashton Brothers, contractors and builders, and later the Ashton Improvement Company. They were responsible for the construction of thousands of houses in Salt Lake City. Edward T.'s sons continued the family involvement with construction: Raymond J. was an architect, Marvin O. was manager of the Rio Grande Lumber Company, and Edward M. was a contractor.

Edward M. went into real estate by himself in 1900 but soon founded the realty firm of Ashton & Jenkins in 1905 with Edward Elmer Jenkins, a businessman involved in real estate and banking. The Ashton-Jenkins Company was also involved in real estate sales for other subdivisions such as Normandie Heights. Edward M. Ashton lived in one of the earliest houses in Yalecrest, designed by his brother, architect, Raymond Ashton, and built by the Ashton Improvement Company, at 1352 Yale Avenue in 1913. Raymond Ashton designed his own house at 1441 Yale in addition to a number of other Yale Park houses as well as commercial and institutional buildings. The Jacobethan Irving School and Sprague Library show his facility with period revival styles. He also designed the Prairie Style bungalow at 1302 Yale Avenue that was home to George Albert Smith, a President of the LDS Church. He was allied with the above Ashton businesses as well as the Ashton-Parry Company and Ashton and Evans, Architects. Other prominent home owners in the Ashton-Jenkins subdivisions include Utah Governor Charles R. Mabey at 1390 Yale, a number of

attorneys (Athol Rawlins at 1475 Yale, William C. Ray at 1408 Yale), as well as various businessmen, dentists and physicians.

Upper Yale Park runs from 1500 to 1700 East along Yale, Yalecrest and Military Drive. Houses and lots were also marketed to prominent people and include a Tudor Revival house designed by the noted Utah architect, Walter Ware, for Lee Charles and Minnie Viele Miller in 1929 at 1607 Yalecrest. Walter Ware designed the First Presbyterian and the First Christian Science Churches among many other buildings in Salt Lake City during his long career from the 1890s to 1949. Lee Charles Miller ran the Mille and Viele Loan Company, first with his father-in-law, then by himself. He specialized in farm loans and financed a number of irrigation systems and reservoirs in southern Utah. His firm was the largest farm mortgage company in the intermountain west. After his death in 1930 Mrs. Miller donated property in his memory along both sides of Red Butte Creek to the city where it became known as Miller Park. Mrs. Miller raised and bred prize-winning Hampshire sheep and Guernsey cattle on her ranch on the Snake River in Idaho. Fred A. Sorenson, most likely of the Sorenson Building Company, built his own house c. 1927 at 1049 Military Drive. He worked as a builder from 1908 to only a few years before his death in 1988. A number of developers were involved in Upper Yale Park including Samuel Worthen, G. Maurice Romney, Samuel Campbell, the Bowers Building Company, and the Vincent Peterson Company.

Gilmer Park was a creation of Kimball and Richards in 1919, and consists of 295 building lots, most of which lie outside of the study area in the Gilmer Park National Register Historic District to the west. Gilmer Drive and Thornton Avenue between 1300 and 1400 South are the Yalecrest section of Gilmer Park. The majority of the residences were constructed in the 1920s for private individuals. Speculative houses were constructed by the Romney Brothers, R. W. Larson (Larson Building), Kimball and Richards and the Modern Housing Corporation. Don Carlos Kimball and Claude Richards formed Kimball & Richards Land Merchants in 1908 to develop and sell land. They were responsible for over 30 subdivisions between 1900 and 1925. They served as developers as well as builders in Yalecrest.

The 1920s were a period of tremendous growth in Yalecrest with eleven subdivisions platted by a variety of developers. The Bowers Investment Company, a branch of the Bowers Building Company, filed the subdivision papers for Normandie Heights in 1926. Dan Weggeland was an architect employed by the Bowers Building Company and responsible for designing many of the houses and apartment buildings constructed by them. George C., Louis J. and Frank B. Bowers were brothers. George C. and Frank Bowers founded the contracting company in 1916 and worked together. Louis J. worked separately as a builder. The Bowers brothers constructed over 3,000 buildings in Utah, Wyoming and Nevada by 1946.

Normandie Heights was the last large subdivision to be platted in Yalecrest, 140 lots, and its houses were built primarily from 1926-35. It is distinctive because of its picturesque rolling topography with landscaped serpentine streets, regular promotions, prominent homeowners, deep setbacks, and large irregularly shaped lots. The builder Gaskell Romney was involved in developing Normandie Heights as well as building houses on speculation. He was active in Utah, Idaho and California and worked in Mexico before coming to Utah in 1921. G. Maurice Romney, his son, also did speculative building. Gaskell Romney and his wife, Amy, lived in Yalecrest at 1442 and later at 1469 Princeton Avenue. Much of the sales of lots and houses were done by the firms of Kimball & Richards, Ashton-Jenkins, Gaddis Investment Company, and Le Grande Richards Realty Company. J.A. Shaffer built several houses on speculation on Laird in 1927. He was briefly involved in Salt Lake real estate before moving to Indiana.

Upper Harvard was registered in 1926 by Herrick & Company (N.L. and O.S. Herrick) and covered both sides of Harvard between 1600 and 1700 East. Uintah Heights Addition consists of Laird Circle, Uintah Circle and Laird between 1400 and 1500 East and was registered in 1928. Houses were constructed there primarily in the late 1920s and early 1930s, many by Herrick and the Gaddis Investment Company. N.L. Herrick, was a partner in the Gaddis Investment Company as well as an individual builder. Herrick and Company provided design as well as construction services. The Gaddis Investment Company was founded in 1922 to deal in real estate, investments and insurance. Both of its partners lived in Yalecrest; N.L. Herrick at 1603 Harvard Avenue and Thomas E. Gaddis at 1465 Laird Avenue in a French Norman house built in 1929. T. Gaddis was involved in real estate and investments in Salt Lake City from 1909 to his death in 1967.

Alice Felkner owned the land that was platted as Upper Yale Addition and Upper Yale 2nd Addition in 1926 & 1927. Alice Felkner was prominent in Utah mining and industrial pursuits. She was born in 1854 in Indiana and moved to Idaho with her brother, William H. Felkner, in 1886 to engage in stock, mercantile and mining businesses. The siblings moved to Salt Lake City in 1909 and lived on 270 East South Temple Street. At the time of her death in 1937 she was a director of the Consolidated Music Company, a large stockholder of the Silver King Coalition Mines Company, and director of several large mining companies. The Upper Yale Additions extend along the north and south sides of Yale and Herbert Avenues from 1700 East to 1800 East. Houses were constructed in the late 1920s and 1930s, primarily by Philip Biesinger, another Yalecrest builder and developer.

Upper Princeton was platted in 1928 and consists of 29 building lots on Princeton between 1600 and 1700 East, owned by Sidney E. and Annie M. Mulcock. S.E. Mulcock both owned the property and built speculative houses. Others were built by Herrick & Company, Gaddis Investment Company, and Henning Henderson. Mulcock built Duffin's Grocery Store in 1925 at 1604, run by Clarence Duffin in conjunction with William Wood & Sons meat market. Duffin's was the only market within Yalecrest and designed to have the same setback and blend in with the surrounding houses.

The 1930 U.S. Census of Population provides views of the occupants of Yalecrest. The typical residents are middle class, often business proprietors or with managerial or professional careers, native born, and own their own homes. Marie Morrison was a grocery store owner and a widow raising two children by herself at 1437 E. 1300 South. Her neighbors on the street were also home owners. Roland Standish owned an advertising agency and lived at 1457 E. 1300 South with his wife, Bertha, and their four daughters. Jacob Madsen and his wife, Mary, were immigrants from Denmark and lived with their two grown children at 1463 E. 1300 South. Jacob and Mary owned a farm out of state and Sarah and Ilta were a stenographer and grade school teacher, respectively. Other occupations on the street were safety engineer, pharmacist, musician, and newspaper compositor.

Several generations shared the Willey house at 1455 East Gilmer. David was an attorney, his son, David Jr. was a salesman for a paint company, and two daughters Dorothy and Katherine, were a stenographer and a clerk. Three grandchildren, a daughter-in-law and mother complete the family resident in the house. Several neighbors had servants, not uncommon in the area. Occupations on the street range from coal mine operator, food and drug inspector, automobile salesman, mining and electrical engineers, sales manager for a furniture company, hotel proprietor and a son who worked as a gas station attendant.

Two brothers lived next door to each other at 1403 and 1411 Michigan Avenue. Joshua Summerhays was a hide and wool merchant who had four children with his wife, Mary. Their eldest daughter, Virginia, was a public school teacher as was her uncle, John, next door at 1411. John

and LaPrella had four children ranging in age from 1 to 8 years old. The Summerhays' neighbors had a variety of occupations which included two engineers, electrical and mining, two stock & bond salesmen, a coal mine inspector, a linotype operator, a manager of a storage company and a sales engineer of steel structures.

An optometrist, a medical doctor, a dentist and an apiarist (beekeeper) lived as neighbors on 900 South. Dr. Byron and Mabel Rees lived at 1382 E. 900 South with their three children, Ralph, Lone and Afton, and Ellen Bybrosky, their Danish servant. Hubert Shaw installed mining equipment for a living and lived with his wife, Edith, at their house at 1434 E. 900 South. J.C. Wilson worked in religious education and lived with his wife, Melina, and their four children at 1466 E. 900 South.

Leslie Pickering was a general building contractor and lived with his wife, Mina, and daughter, Beverly, at 1464 E. Michigan Avenue. He is not known to have constructed any buildings in the Yalecrest area. Pinsk, Russia, was the birthplace of Simon Weiss who worked as a clothing salesman after coming to this country as a child in 1903. His wife, Claire, and daughter, Betty, were both born in Utah. The Weiss family owned their home at 1363 Thornton Avenue.

Individual developers occasionally built an entire street of speculative houses. A district of small cottages, from 1500 to 1600 East on Princeton and Laird Avenues, was for the most part constructed by Samuel Campbell; Princeton in 1924 and Laird in 1925. Samuel Campbell worked as a contractor/builder in Salt Lake City from 1913 to 1930 and built more than sixty houses in Yalecrest. He built primarily on speculation frequently with financing from the Ashton-Jenkins Company. Many of the houses served as rentals to middle class tenants before being sold. The cottage district was not part of a subdivision. Louis J. Bowers is another example of a single builder doing an entire street. He built all of the houses on Uintah Circle in the Mayfair Park subdivision (platted in 1930) on speculation in 1937 and 1938.

Six subdivisions were platted in the 1930s. The last was Yalecrest Heights on the east side in 1938. It surrounds the 1936 Yalecrest Ward on three sides and borders on 1900 East. After its plat was registered no substantial vacant space was left in the Yalecrest area.

World War II and Postwar Growth (1940-1959)

This was a period of growth for Yalecrest as well as the rest of the city. The emergence of the defense industry in the Salt Lake valley in the early 1940s and the return of the GIs after the war caused a great need for housing. The population of Salt Lake City grew by 40,000. The FHA (Federal Housing Administration) estimated at the time that Salt Lake City needed 6,000 more housing units to meet the postwar demand. New houses appeared on what were formerly vacant lots at Yalecrest and many homeowners took out building permits to finish basement or attic space for more room or to rent out as apartments.

The vehicles of mass transit changed from streetcars to buses but in general began to be supplanted by the use of private cars. By 1940 the 1500 East streetcar was gone and city buses served Yalecrest traveling along 1300, 1500 and 1700 East as well as 900 and 1300 South.

A land swap gave the southern section of Miller Park to the LDS Church in 1945 in exchange for property that became Laird Park, located on 1800 East between Laird and Princeton. Land that was previously Miller Park was used for construction of the Bonneville Ward Chapel and Stake House. Its red brick Postwar Colonial Revival style building was designed by Lorenzo S. Young and constructed by the Jacobsen Construction Company in 1949. Bonneview Drive was

constructed by the church as a private road to provide access to the building. It was later made public.

No new subdivisions were registered as all remaining sections of vacant land had been platted by 1938. Vacant lots and streets on existing subdivisions, however, were filled in during this era. For example, the Hillside Park subdivision was registered in 1937 by the Anderson Lumber Company, an active builder in Yalecrest, but initial construction on the streets of Cornell Circle and Laird Avenue from 1700 to 1800 East didn't begin until 1939 and continued into the 1940s.

1960's and Beyond (1960-2005)

The Yalecrest area avoided the blight common in many urban residential neighborhoods during this era. There was no population pressure as the population of Salt Lake City slightly decreased during this time period.¹² No major roads were built through the neighborhood although traffic increased on the border streets of 1300 South, 1300 East and Sunnyside. Zoning ordinances restricted commercial building to a few spots on the major streets. The only apartment building is located on one of the two lots that have been zoned multi-family. The original Uintah Elementary School was demolished and replaced by a new structure in 1993. The attractive neighborhoods of Yalecrest have mature street trees, single-family owner-occupied well-maintained houses with landscaped yards and continue to be a desirable residential area.

Fieldwork Techniques and Methodology

The survey was conducted in accordance with the Utah State Historic Preservation Office (SHPO) Standard Operating Procedures for Reconnaissance Level Surveys, as Revised June 2003. In contrast to the above procedures, digital photography was used. Photographs were taken using a Nikon Coolpix 3200 digital 35mm camera with a 3X optical zoom lens and, as needed, an external Digital Concepts 0.5x wide angle lens. CDs containing digital images of the principal structures in files by street were provided to both the city and the SHPO. The streets are arranged in the same order as the SHPO Architectural Survey Database of information on historic architectural and cultural resources in Utah. The numbered streets come first, each digit in numeric order, then the alphabetical street names. Both the city and the SHPO received printed copies of the images on the Digital Contact Sheets, (Appendix F) with up to twelve images to a sheet in landscape mode,¹³ in color on semi-glossy professional photo paper, and accompanying Architectural Survey Data sheets (Appendix E).

A Standard Reconnaissance Level Survey photographs, maps, and documents every principal building encountered in the survey area. Each site was photographed and recorded on the survey map. The survey map was prepared based on an aerial map of the Yalecrest area with lot lines and addresses marked, as provided by the Salt Lake City Planning Department. Information on the estimated construction date, exterior building materials, height, architectural style and type, and use of the property was recorded on the survey forms. The number and eligibility of existing outbuildings (contributing or noncontributing) was also recorded. Names were included as appropriate for commercial, public, and religious buildings.

All buildings surveyed were evaluated using criteria developed by the SHPO to indicate age and integrity and assigned a value of A, B, C, or D. A building receiving an "A" evaluation must be more than fifty years old, retain historic integrity and also possibly be considered as either historically or

¹² 189,454 in the 1960 U.S. Census and 181,743 in 2000.

¹³ As a new street is begun, a cell in the table will be used to identify the new street.

architecturally significant. Buildings with a “B” designation retain most of their historic integrity but have some modifications that prevent an “A” evaluation. “B” buildings may be considered for the National Register of Historic Places as part of a multiple property submission or a historic district, with corrective action, or based on their historic associations rather than their architectural significance. Buildings with a “C” designation have lost their architectural integrity as a result of subsequent modifications. A “C” building may not be eligible for the National Register but may have important local historical value and be listed on a city register. A, B, and C buildings were constructed during the historic period. A and B buildings are eligible as contributing buildings in a historic district. “D” buildings were constructed outside of the historic period and are considered “out-of-period.”

The National Park Service criteria for inclusion in the National Register of Historic Places (1966) state that a property must be at least fifty years old, with some exceptions, to be included. To extend the usefulness of the survey, buildings constructed in 1959 or earlier are considered within the historic period. Buildings constructed in 1960 or later are designated with a “D” evaluation on the survey forms and on the map as “Out of Period.”

In an unusual step for a reconnaissance level survey, the names of the owner at the time the building permit was taken, the year the building permit was obtained, and the years of subsequent changes to the structures requiring building permits were obtained by searching files of Salt Lake City building permits.¹⁴ If a building permit for the initial construction was not found, an approximate date was noted on the survey data sheet. The building permit cards were handwritten and contain various spellings of the owner’s or builder’s names. If the owner of the property at the time the building permit was granted is known to be a builder, it may be assumed that the structure was being built for future sale (a “spec” or speculative house) rather than for a specific owner. The builder’s or original owner’s name was added to the machine readable record for the property and appears in the Final Report printouts in the Comments section.

A copy of previously entered data for Salt Lake City in Microsoft Access data format was provided to the consultant by the SHPO at the beginning of the study. There were 157 properties in the Yalecrest area previously entered into the database. Most of these existing entries resulted from a 1985 study of various Salt Lake City east side neighborhoods. These and other records were updated and new ones were input during the 2005 survey. Many of the garages in Yalecrest are detached and located behind the houses. The count of garages may be an undercount as placement at the rear of the house on or an alley may obscure the view of the garage.¹⁵

¹⁴ The Alchemy database is available at the Salt Lake City Planning Department. Microform copies of the building permit cards are available at the State Archives (Utah History Research Center).

¹⁵ Alleys are found between Michigan and Gilmer Avenues between 1300 and 1500 East, between Gilmer and Yale Avenues from 1400 to 1500 East, between Hubbard and Michigan Avenues from 1500 East to Fairview Avenue and between Fairview Avenue and Greenwood Terrace from 900 South to Diestel Road.

Summary of Results

General Findings

A total of 1,487 primary structures or resources were documented during the Yalecrest Reconnaissance Level Survey. Four structures are listed as demolished. Of the 1,487 primary resources, 1,349 (91percent) contribute to the historic character of the Yalecrest area. Of this total 948 (64 percent) are eligible/significant and 401 (27 percent) are eligible/contributing. The remaining 138 resources are noncontributing. New or out-of-period structures constitute 2 percent (or 30) and the remainders are altered historic buildings, 108 (7 percent). For the purpose of extending the usefulness of the survey, a structure is considered historic if it was built in 1959 or earlier. The statistical summary of the survey data for the contributing buildings only, the Historic Building Report, appears as Appendix E.

The typical house in Yalecrest is a brick single family English Cottage style period cottage built in the 1920s. By far the majority of the buildings (74 percent) were constructed between 1920 and 1939. Almost all (99 percent) of the structures were residential and those were overwhelmingly (96 percent) single family. More than half of the structures (54 percent) use brick as a wall cladding material. Small houses are the rule with 66 percent one story, 23 percent one-and-a-half stories and ten percent two stories tall. Most of the houses have detached garages, located to the rear of the building lot. Although not recorded or tabulated in the survey, a number of garages are built under the houses in this era. Of the outbuildings (primarily garages) recorded, fifty-six percent are built within the historic period.

The nonresidential structures recorded include three Church of Jesus Christ of Latter-day Saints ward houses, as well as several commercial and industrial/utility structures. Landscape features include two parks; Miller Park, set in the Red Butte stream ravine, and the neighborhood area Laird Park.

Findings by Contextual Period

Individual properties will not be named in the discussion below and may be found in the listing of properties recommended for Intensive Level Surveys.

The Big Field Survey and Agricultural Use, 1849-1909

The area was used as farmland with only scattered farm houses and agricultural structures at the end of the nineteenth century. No extant buildings were expected or identified from this era.¹⁶

Streetcars, Subdivision Development and Automobiles, 1910-1939

The overwhelming majority of resources (81 percent) were constructed during this period. The principal building types are divided between bungalows (19 percent) and period cottages (53 percent), both immensely popular during this era. The bungalow was a ubiquitous housing type and style in the first quarter of the twentieth century in Utah and bungalows were the first houses to appear in Yalecrest. The simple bungalow style appears in 15 percent of the buildings surveyed.

¹⁶ During the course of the survey skeletal remains were found of an early inhabitant of Yalecrest in the ravine behind 1480 Yale Avenue. Archaeologists state that he was a Fremont Indian and lived 1,000 years ago.

Stylistic elements of the Prairie School (110 or 7 percent) and the Arts and Crafts movement (26 examples) appear in bungalows and two story houses ranging from high-style architect-designed examples to simplified examples in the early subdivision and developer tracts.

The largest category of house types in the survey is the period revival house with 714 (53 percent) of the primary structures of this type. The most popular styles are the English Cottage comprises (310 or 19 percent) and the English Tudor (242 or 15 %). Both styles emphasize irregular massing, gabled roofs and the decorative use of various cladding materials. Half-timbering is the most easily recognizable style characteristic of the English Tudor. There are 149 (9 percent) Colonial Revival examples that vary from brick two-story houses to smaller Cape Cod cottages. Less common styles such as the chateau-like French Norman (30 examples), gambrel-roofed Dutch Colonial (12), Jacobethan Revival (15), and Spanish Colonial revival (6) are also found. A handful of Art Moderne, Art Deco and International style houses with their flat roofs provide more variety in the neighborhood.

Common subsequent alterations to bungalows and period cottages include replacing the original windows, recladding in vinyl or aluminum siding, and constructing dormers to utilize attic space or additions, occasionally two-story, to the rear. Bungalow modifications frequently enclose the broad front porch.

World War II and Postwar Growth (1940-1959)

The World War II and post war period provided nineteen percent of the principal contributing structures in the survey area; fifteen percent from the 1940s and five percent from the 1950s. Styles encountered range from late period revival cottages and World War II cottages to early ranch and ranch houses in a range of wall cladding. Some contemporary or “modern” examples are also found, including a stylish “butterfly” roof house. Styling in this era is simplified, Minimal Traditional and ranch examples predominate. Attached garages are more common in this era than earlier.

1960's and Beyond (1960-2005)

Very little construction of new buildings has taken place and therefore few buildings (30 or 2 percent) date from this period. The area was built out quickly in the earlier period leaving little vacant land for new construction. Yalecrest remains a desirable residential area with mature street trees, winding streets and well-maintained houses and yards. New construction is primarily replacement, renovation or addition to an existing single family house.

During the survey, residents frequently commented to the surveyor on their concern about “losing the character” of their unique neighborhood by the construction of oversized houses. A current neighborhood issue is the construction of out-of-scale houses and intrusive additions to existing houses. See Zoning Overlay Ordinance below.

Recommendations

Potential National Register Historic District

The area is remarkably visually cohesive with a high degree of historic integrity. It is recommended that the survey area be designated as a historic district dealing with the growth of Salt Lake City on the residential east bench through early twentieth century subdivision development. The boundaries of the potential district are natural with arterial streets on the north and east. Additional reconnaissance level survey work should be conducted on the neighborhoods adjacent to the south and east of the survey area to determine final district boundaries.

Alternatives to a large scale district would be several smaller neighborhood districts, some based on subdivision plats. (See Appendix B: Subdivision Information). Examples follow:

- Laird and Princeton Avenues cottage district - between 1500 and 1600 East
- Michigan Avenue cottage district – between 1700 East and Le Grand Street
- Normandie Heights – Harvard, Princeton & Laird between 1300 & 1500 East including Normandie, Laird and Uintah Circles
- Lower Yale Avenue – 1300 to 1500 East
- Upper Yale Park – both sides of Miller Park running from 900 South to 1500 East including Yale, Yalecrest and Military, Bonneview and Diestel

Properties Recommended for National Register Level Research

The following properties are recommended for National Register Level Research. Previous research may have been completed on some of the properties.

- 941 S. 1300 East – built 1913 – cobblestone Craftsman bungalow (Shipler photo available)
- 851 S. 1400 East – built c. 1912 – great Craftsman bungalow – also Shipler photo
- 936 S. 1500 East – built c. 1917 – “Oriental” style bungalow with clinker bricks, rubble
- 1035 S. 1800 East – built 1936 – concrete Art Deco Yalecrest LDS ward
- 973 S. Diestel – built 1936 – Art Deco residence of Glen Finlayson, architect
- 1389 E. Harvard – built 1929 – Richard Bird/Ezra Taft Benson house, French Norman style
- 1762 E. Michigan – built 1928 – Tudor cottage with full-story narrow niche
- 1768 E. Michigan – built 1930 - French Norman cottage with turrets
- 1308 E. Laird – built 1938 –brick Art Moderne two story
- 1330 E. Yale – built 1914 –Woolley House - two-story Prairie house
- 1390 E. Yale – built 1928 – residence of Utah governor Charles R. Mabey, Ashton-designed
- 1607 E. Yalecrest – built 1929 – Walter Ware-designed English Tudor for Miller Park donors

Properties Recommended for Intensive Level Research

Less than 10% of the properties in the survey area have had historic research done on them. With 968 properties deemed eligible/significant, there are many potential candidates for additional research. The attached list, Appendix C, lists properties recommended for further research, in address order.

Zoning Overlay Ordinance

The current practice of razing an existing small historic structure and replacing it with a residence several/many times the size of the original house¹⁷ in established neighborhoods has galvanized some residents into action. A group of Yalecrest neighbors have prepared a zoning overlay ordinance for review by the Salt Lake City Council. The purpose of the ordinance is:

to encourage compatibility between new construction, additions or alterations and the existing character and scale of the surrounding neighborhood.¹⁸

The proposed guidelines would regulate building height, minimum front yard size, and several aspects of garages or accessory structures. The issue is slated to go before the Salt Lake City Council in the summer of 2005.

¹⁷ The demolition and construction of a large-scale house at 1788 East Hubbard Avenue in c. 1998 was the precipitating event for Yalecrest neighbors.

¹⁸“Yalecrest Compatible Infill Overlay District,” Planning Commission Draft, November 10, 2004, p1.

Properties Recommended for Intensive Level Research

Listed in street number order

979 S. 1300 East – built c. 1922 – probable Slack Winburn design
1013 S. 1300 East – built c. 1915 – brick Neoclassical foursquare
1227 S. 1300 East - built 1930 – one of several Period Revival duplexes

1675 E. 1300 South – built 1951 – Bowers-built commercial building
1819 E 1300 South – built 1955 – modern residence
1857 E.1300 South – built 1942 – good example of many built by L.J. Bowers on the block

871 S. 1400 East – built 1915 – clinker brick Fred Swaner-designed Prairie School bungalow

932 S. 1500 East – built c. 1917 – stucco Prairie School bungalow with leaded glass
947 S. 1500 East – built 1920 – Neoclassical bungalow with eyebrow dormer
1017 S. 1500 East – built 1924 – two-story brick Colonial Revival
1100 S. 1500 East – built c. 1924 – Spanish Colonial style

1036 S. 1700 East – built 1926 – transitional bungalow/period cottage
1052 S. 1700 East – built c. 1925 – nice English cottage
1135 S. 1700 East – built 1929 – French Norman/Jacobethan style elements, wall dormers

1121 S. 1800 East – built 1941 – four square with Art Moderne brise soleil

852 & 860 S. 1900 East – built 1942 – two-story brick apartment buildings

1434 E. 900 South – built c. 1925 – unusual step gable on front dormer
1445 E. 900 South – built 1929 – nice English Tudor with steep gables
1549 E. 900 South – built 1934 – basketweave brick on English Tudor cottage
1555 E. 900 South – built 1915 – Arts & Crafts bungalow with river rock-clad porch
1621 E. 900 South – built 1929 – Prairie School bungalow
1627 E. 900 South – built 1926 – nice bungalow/cottage
1671 E. 900 South – built 1953 – ranch-rambler with garage underneath
1800 E. 900 South – built 1937 – large late period cottage

1500 E. Bonneview – built 1948 – Post-war Colonial Revival LDS ward

867 S. Diestel – built 1936 – atypical English Tudor/ Cape Cod combination
939 S. Diestel – built 1945 – nice frame Cape Cod
963 S. Diestel – built 1936 – developer G. Maurice Romney's residence

939 S. Fairview Avenue – built 1928 – two-story brick side passage
940. Fairview Avenue – built 1932 – English Cottage duplex

1317 E. Gilmer – built 1925 – expansive bungalow
1431 E. Gilmer – built c. 1925 – Woolley & Evans Colonial Revival LDS ward house
1459 E. Gilmer – built 1919 – Arts & Crafts bungalow with cobblestone
1466 E. Gilmer – built 1916 – California bungalow

921 S. Greenwood – built 1938 – 2 story Colonial Revival

1407 E. Harvard – built 1929 – large brick French Norman style
1412 E. Harvard – built 1927 – Backer's French Norman
1426 E. Harvard – built 1927 – brick and stucco French Norman
1455 E. Harvard – built 1933 – Jacobethan with bas-relief on façade
1579 E. Harvard – built 1915 - Prairie School foursquare
1603 E. Harvard – built 1925 – builder N.L. Herrick's residence
1615 E. Harvard – built 1925 – transitional from bungalow to period cottage
1715 E. Harvard – built 1930 - nice leaded glass in a French Norman cottage
1885 E. Harvard – built 1941 – WWII era cottage with brise soleil

1722 E. Herbert – built 1927 – unusual brick English cottage
1757 E. Herbert – built 1928 – rolled eaves –model home in 1928 for P. Biesinger
1779 E. Herbert – built 1937 – 1 ½ story French Norman with eyebrow dormers
1865 E. Herbert - built 1938 – uncommon Art Moderne residence

1804 E. Harvard – built 1951 – modern “butterfly” roof

1516 E. Hubbard – built – 1916 – rock-faced concrete block bungalow
1520 E. Hubbard – built – 1919 – clinker brick bungalow with clinker brick chimney
1764 E. Hubbard – built 1937 – representative of other Cape Cods on the street
1773 E. Hubbard – built 1935 – English cottage duplex with pointed arches

1362 E. Laird – built 1927 – Spanish Colonial revival
1374 E. Laird – built 1927 – French Norman style with two turrets
1465 E. Laird – built 1929 – long-time residence of Thomas E. Gaddis, builder & investor
1617 E. Laird – built 1936 – transitional period revival cottage
1723 E. Laird – built 1939 – late brick period cottage

1327 E. Michigan – built 1915 – two story Prairie School by Jesse Craig, architect
1340 E. Michigan – built 1930 - transition between a period and a WWII cottage type
1445 E. Michigan – built 1915 – Prairie School bungalow built by S.M Woolley
1504 E. Michigan – built 1916 – representative of a block of bungalows
1608 E. Michigan – built 1935 – possible Lorenzo S. Young-designed
1731 E. Michigan – built 1927 – nice brick and stucco cottage

972 & 980_S. Military – built 1927 – typical of a number of 1 ½ story English Tudors

1049 S. Military – built 1927 - builder Fred Sorenson's residence

1604 E. Princeton – built 1925 - was Duffin's Grocery Store

1465 E. Princeton – built 1925 - bowed roof over French doors on English Cottage

1532 E. Sunnyside – built 1937 – Spanish Colonial Revival built by Douglas Park Corporation

1552 E. Sunnyside – built 1940 – transition between a period and a WWII cottage type

1862 & 1868 E. Sunnyside – built 1942 – 2-story brick Claude Richards apartment buildings

1344 E. Thornton – built 1922 – unusual picturesque cottage

1451 E. Uintah Circle – built 1939 – representative of several Colonial Revival examples

1643 E. Wasatch Circle – good example of an entire block built by L.J. Bowers in 1937-8

1314 E. Yale – built 1930 – French Norman two-story

1352 E. Yale – built 1913 - R.J. Ashton-designed Prairie bungalow

1408 E. Yale – built 1915 – Taylor Woolley-designed Prairie foursquare

1412 E. Yale – built 1923 - Crawford/Bennett House, Prairie four square

1441 E. Yale – built 1913 – Prairie bungalow home of Raymond Ashton, architect

1467 E. Yale – built 1915 – brick Woolley-designed two-story

1663 E. Yale – built 1926 – English cottage with a great garage

1762 & 1768 E. Yale – built 1926 – representative of block of period cottages (1768 is title sheet photo)

1802 E. Yale – built c. 1928 – unusual two-story period revival style

1604 E. Yalecrest – built 1935 – interesting arches

1751 E. Yalecrest – built 1928 – Colonial Revival with porte cochere

1776 E. Yalecrest – built 1928 – combination of Tudor and Colonial Revival styles

1784 E. Yalecrest – built 1928 – English cottage with interesting stucco & brickwork

1815 E. Yalecrest – built 1938 – brick Cape Cod

BUILDERS AND DEVELOPERS OF YALECREST¹

Amundsen, R. B. - 1500 East, Amanda, Harvard, Laird
Anderson Lumber Company – 1300 South, Laird, Michigan, Park Row, Princeton
Ashton-Jenkins – 900 South
Biesinger, George – Laird
Biesinger, Herbert - Herbert
Biesinger, Philip -Harvard, Herbert, Princeton, Yale, Yalecrest
Birkenshaw, M. – Princeton
Birkenshaw, Thomas (Joseph W.) - Gilmer
Bowers Building Company/Bowers Investment Co. - 1300 East, 900 South, Harvard, Laird, Mayfair, Normandie, Princeton, Yale
Bowers, George C. – 1500 East, Michigan,
Bowers, Louis J. -1300 East & South, 1700 and 1900 East, Harvard, Wasatch
George Bowles & Son – Military, Park Row
Bratt, N.M. – 1500 East
Buehner, Carl – Laird, Laird Circle, Uintah
Builders Loan & Trust - Gilmer, Harvard
Butte Salt Lake Investment Company – Park Row
Campell, Samuel – 1500 & 1700 East, Harvard, Laird, Michigan, Military, Princeton, Yale
Capitol Building Co. – 1500 East, Hubbard, Michigan
Childe, Charles W. – 900 South, Laird, Michigan
Chytraus, L. – Michigan, Sunnyside
Construction Securities - Laird Circle
Cummings, J.R. (Cummings Investment Company) – Thornton
Dorland Construction Company – 1900 East
Doxey-Layton Co. (Layton Construction Company) - 1700 E, Harvard, Hubbard, Laird, Michigan, Princeton, Yale, Yalecrest
Federal Homes – Michigan
Fish, L. L. – Harvard
Gaddis Investment Co. – 900 South, 1800 East, Harvard, Laird, Michigan, Yale, Yalecrest,

¹ Information on builders is taken from images of the original building permits found at the Salt Lake City Planning Department. Files are handwritten and occasionally, difficult to decipher.

Gensen, Rich -Herbert

Gibbs, Lauren W. – 1900 East, Hubbard, Sunnyside

Henderson, Henning – 900 South, 1700 East, Diestel, Greenwood, Hubbard, Michigan, Military

Herrick Building Co. (Herrick Bros., Herrick & Co., N.L.) – 900 South, 1300 South, 1700 and 1800 East
Diestel, Harvard, Laird, Princeton

Hodson, William N. – Yalecrest

Hogle Investment Company – Princeton

W.E. Hubbard Investment Co. – Michigan

Jenkins, D.A. – 1500 East

Johnston Building Co. – 900 South, 1500 East, Michigan

Jorgensen, A.E. – 900 South, 1400 East, Diestel, Fairview, Harvard, Michigan, Normandie, Uintah

Juliussen, Thomas – Harvard, Michigan, Yale

Kimball & Richards – Michigan, Thornton

Larsen, Niels B. - Hubbard

Larson, R.W. (Larson Building Co.) – Gilmer, Michigan, Thornton

Lund Brothers -Yale

McKean, Howard J. – 900 South, Harvard, Yale

National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Yalecrest Historic District

other name/site number Harvard-Yale

2. Location

street name Roughly bounded by Sunnyside Avenue (840 South) to 1300 South and 1300 East to 1800 East

☐ not for publication

city or town Salt Lake City

☐ vicinity

state Utah code UT county Salt Lake code 035 zip code 84105

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this ☒ nomination
☐ request for determination of eligibility meets the documentation standards for registering properties in the National Register
of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the
property ☒ meets ☐ does not meet the National Register criteria. I recommend that this property be considered significant
☐ nationally ☐ statewide ☒ locally. (☐ See continuation sheet for additional comments.)

Signature of certifying official/Title

Date

Utah Division of State History, Office of Historic Preservation

8. Description

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☒ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- ☒ **A** owned by a religious institution or used for religious purposes.
- ☐ **B** removed from its original location.
- ☐ **C** a birthplace or grave.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object, or structure.
- ☐ **F** a commemorative property.
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets.)

9. Major Bibliographical References

Bibliography

Paperwork Reduction Act Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.).

Estimated Burden Statement: Public reporting burden for this form is estimated to average 18.1 hours per response including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Projects (1024-0018), Washington, DC 20503.

National Register of Historic Places Continuation Sheet

Section No. 7 Page 1

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Narrative Description

Site

The Yalecrest Historic District is a residential neighborhood located on the East Bench of Salt Lake City, eight blocks to the south and thirteen blocks to the east of the downtown business area of the city. It is remarkably visually cohesive with the majority of the houses built in subdivisions of period revival-style cottages in the 1920s and 1930s. The Yalecrest Historic District consists primarily of residential buildings but also contains three contributing churches, three commercial buildings (two noncontributing, one contributing) and two contributing parks. Single family houses predominate but there are also fifty-one multiple dwellings, most of which are duplexes.

There are one thousand four hundred eighty seven (1,487) primary resources within the historic district. The district retains a high degree of historic integrity as the overwhelming majority (91%) of the resources, one thousand three hundred forty nine (1,349), contributes to the historic character of the district. There are nine hundred eighty nine (989) outbuildings which are primarily detached garages set to the rear of the lots, the majority from the historic period. All of the streets in the district are paved with curbs, gutters and sidewalks [Photograph 1]. Only one building, a Prairie School-style bungalow, the George Albert Smith House at 1302 Yale Avenue, has been listed on the National Register [listed 1993].

The historic district boundaries coincide with those of the Yalecrest Community Council¹ district and are the surrounding major collector streets, Sunnyside Avenue, 1300 and 1900 East, and 1300 South. The district is visually distinctive from the neighboring areas by its cohesive historic-era architecture, unified tree plantings and landscape design that reacts with the natural topography of the creeks and gullies that cross the area. The architecture is remarkable for the concentration of fine period revival style houses; seventy four percent of the contributing resources (74%) were built from 1920-1939. These houses exhibit a variety of period revival styles with the largest portion being English Tudor (240 examples) and English Cottage (313 examples) styles.

Street patterns vary and represent several concepts of city planning: the rectilinear street grid of streetcar suburbs on the low relief sections, undulating patterns following the edges of streams and gullies, and the use of culs-de-sac and semi circles to limit traffic. There are a handful of alleys in the grid sections. Large uniform mature shade trees line the streets and the houses maintain similar setbacks and scale on the street faces [Photograph 2]. Street lighting is provided by two types of non-historic lamps; one with a cast concrete pole and a metal and glass top [Photograph 3] and the other, a metal pole on a concrete base [Photograph 4]. The yards have established landscaping with lawns and gardens. Both buildings and yards are well-maintained. Because of its historic residences and the tree-lined streets, the neighborhood was initially and continues to be one of the most desirable residential areas of the east bench of Salt Lake City.

¹ Community Councils are "neighborhood-based community organizations whose purpose is to provide community input and information to [Salt Lake] City departments." www.slcgov.com/citizen/comm_councils/

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Survey Methods and Eligibility Requirements

Buildings were classified as either contributing or non-contributing based on the results of a reconnaissance level survey of the Yalecrest area in 2005.² Each building was evaluated for eligibility using the following guidelines set by the Utah State Historic Preservation Office.

A – Eligible/significant: built within the historic period and retains integrity; excellent example of a style or type; unaltered or only minor alterations or additions; individually eligible for National Register under criterion “C,” architectural significance; also, buildings of known historical significance.

B - Eligible: built within the historic period and retains integrity; good example of a style or type, but not as well-preserved or well-executed as “A” buildings, though overall integrity is retained; eligible for National Register as part of a potential historic district or primarily for historical, rather than architectural, reasons. The additions do not detract and may be reversible.

C – Ineligible: built during the historic period but has had major alterations or additions; no longer retains integrity. The resource may still have local historical significance.

D – Out-of-period: constructed outside the historic period.³

Evaluations are based primarily on age and architectural integrity. A building may sometimes appear newer than its actual construction date because of intrusive alterations and additions. Surveyors attempt to determine the oldest portion of the building by looking for signs of greater age such as composition, massing, fenestration, foundation materials, chimneys and landscaping.

Architectural Styles, Types and Materials by Period

Streetcars, Subdivision Development and Automobiles (1910-1939)

The greatest number of resources (one thousand eighty-six or 81 percent) were constructed during this period, primarily via subdivision development. The principal building types found are bungalows (19 percent) and period cottages (53 percent), both immensely popular in Utah during this era. The bungalow was a ubiquitous housing type and style in the first quarter of the twentieth century in Utah and bungalows were the first houses to appear in Yalecrest. Bungalows have rectangular plans and are low to the ground with low-pitched roofs, either gabled or pitched. Stylistic elements of the Prairie School (110 examples) and the Arts and Crafts movement (26 examples) appear in bungalows and two story houses ranging from high-style architect-designed examples to simplified examples in the early subdivision and developer tracts. The Prairie School Style has a horizontal emphasis with broad overhanging eaves, low-pitched hip roofs, and casement

² The boundaries of the historic district are the same as those of the 2005 reconnaissance level survey.

³ *Reconnaissance Level Surveys, Standard Operating Procedures*. Utah State Historic Preservation Office, Rev. October 1995.

National Register of Historic Places Continuation Sheet

Section No. 7 Page 3

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

windows. Many Yalecrest houses retain remarkable integrity, like the following Arts and Crafts bungalows: the stucco and cobblestone 1913 Brandenburger House at 1523 East 900 South (Photograph 5) and the W.R. Hainey House, a 1912 clinker brick example at 871 South 1400 East [Photograph 6]. The Prairie School vernacular style bungalow designed and built by Raymond Ashton, architect, as his own home was constructed of brick in 1913 at 1441 East Yale Avenue [Photograph 7]. The stucco and brick 1916 example at 1540 East Michigan Avenue [Photograph 8] is representative of a number of vernacular Prairie School bungalows in the area. It has the horizontal emphasis of the Prairie School as well as a more formal porte cochere. The Taylor A. Woolley-designed William and Leda Ray House at 1408 East Yale Avenue is a two-story brick Prairie School style box house with wide eaves built in 1915 [Photograph 9].

Two streets of small cottages between 1500 and 1600 East were constructed by a single developer, Samuel Campbell, in 1924 (between 1515 and 1589 Princeton Avenue) and 1925 (from 1515 to 1592 Laird Avenue). The clipped gable brick cottage on 1538 East Princeton Avenue [Photograph 10] was built in 1924 and is typical of the scale of the houses on the street. A small market at 1604 East Princeton Avenue was built by S. L. Newton in 1926 and later converted to single family use [Photograph 11]. The 1925 brick clipped-gable cottage at 1522 East Laird Avenue has columns and round-arched windows, characteristic of the distinguishing architectural detail Campbell and other builders supplied to the cottages [Photograph 12]. The sloping topography of the neighborhood makes garages underneath the house a practical solution to the space issues of a small lot. Samuel Campbell built the side-gabled brick clipped-gable cottage at 1207 South 1500 East with a garage underneath in 1925 [Photograph 13].

The period revival cottage is the largest category of building type in the neighborhood comprising 714 (53 percent) of the primary structures. Period revival styles were popular in Utah from 1890 to 1940. The most popular styles in Yalecrest are the English Cottage (310 or 19 percent) and the English Tudor styles (242 or 15 percent). Period revival styles are hypothesized to have been made popular in the United States by soldiers returning from World War I who had been exposed to the vernacular French and English historic architectural styles in Europe. The English cottage style refers to vernacular medieval English houses and differs from English Tudor in that the houses are of brick construction and do not typically feature false half-timbering. The English cottage period revival houses were frequently built between the world wars by speculative builders on small urban lots. They are mostly clad with brick and have irregular, picturesque massing, asymmetric facades, and steep front-facing cross gables. Both styles emphasize irregular massing, gabled roofs and the decorative use of various cladding materials. Single-story houses predominate although there are also a number of elegant two story examples.

Most of the prominent builders of the time constructed houses in Yalecrest in the English cottage and Tudor styles. The William Eldredge House at 1731 East Michigan Avenue is a brick and stucco English cottage-style single-story period cottage built in 1927 [Photograph 14]. A duplex period cottage-type house with rock façade on the twin steep front-facing gables was built in the English cottage style in 1932 at 940 South Fairview Avenue [Photograph 15]. A simpler English cottage style is a brick duplex at 1474 East Laird Avenue built in 1930 [Photograph 16]. Half-timbering is the most easily recognizable style characteristic of the English Tudor. A number of larger one-and-a-half and two-story Tudors are found in the Military Way area. In 1929 Samuel Campbell built the two-story house at 972 East Military Drive with half-timbering and

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section No. 7 Page 4

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

steep gables [Photograph 17]. A smaller single-story example with half-timbering in its gable ends was built by the Layton Construction Company in 1928 at 1780 East Michigan Avenue [Photograph 18]. D.A. Jenkins built a number of houses along 1500 East including the Tudor with a basket-weave brick pattern at 1035 South 1500 East in 1927 [Photograph 19]. The 1926 Lawrence Naylor House at 1510 East Yale Avenue has a half-timbered second story wing [Photograph 20]. Layton Construction Company also built a one-and-a-half story Tudor with an oriel window for John and Bertha Barnes in 1926 at 1785 East Yalecrest Avenue [Photograph 21]. Doxey-Layton built the single-story multicolored brick English Cottage on the corner at 1783 East Harvard Avenue in 1930 [Photograph 22].

Other period revival style houses in the Yalecrest Historic District range from the chateau-like French Norman (30 examples), gambrel-roofed Dutch Colonial (12), Jacobethan Revival (15), and Spanish Colonial Revival (6) to the eclectic, combining several styles. A number of imposing French Norman style houses are found in the Normandie Heights subdivision area, developed between 1926 and 1935 with large irregularly-shaped lots on serpentine streets and substantial houses. The Leo Bird house was owned by former Mormon Church president Ezra Taft Benson and has a unique sculptured wooden roof. It was built in 1929 at 1389 East Harvard Avenue [Photograph 23]. An expansive neighboring house, built and owned by the contractor Eugene Christensen in 1933 at 1407 East Harvard Avenue, also has the characteristic French Norman conical tower [Photograph 24]. The John Lang House is a stucco-covered Spanish Colonial with a red tile roof built in 1924 at 1100 South 1500 East [Photograph 25]. The eclectic brick one-and-a-half story house at 1757 East Herbert Avenue [Photograph 26] was built as a model home in 1928 by the prolific builder Philip Biesinger. It has the rolled edge roofing imitative of thatch, one of the characteristics of period revival houses.

There are 149 (9 percent) Colonial Revival examples in Yalecrest that vary from large brick two-story houses to smaller Cape Cod cottages. A classic one-and-a-half story frame Cape Cod cottage was built in 1936 at 939 South Diestel Road by G. Maurice Romney for Adrian and Camille Pembroke, owners of a business supplies store [Photograph 27]. The two-story brick hip-roofed Colonial Revival with shutters at 1547 East Yale Avenue was built in 1924 of striated brick [Photograph 28].

A handful of Art Moderne, Art Deco and International style houses provide a contrast to the surrounding steeply gabled period cottages and give variety to the Yalecrest neighborhood. The flat-roofed smooth-walled Art Moderne/International style Kenneth Henderson House at 1865 East Herbert Avenue was built in 1938 [Photograph 29]. The Dal Siegal House at 1308 East Laird Avenue was constructed of striated brick in 1939 [Photograph 30]. Its lack of ornamental details, rounded corners and smooth wall surfaces show the influence of the Art Moderne style in the late 1930s in Salt Lake City.

Towards the end of this era period cottages began to be supplanted by World War II cottages. The house at 1571 East Michigan Avenue is a transition from the steep-gabled period cottages to the boxier minimal traditional styling of the World War II cottage. It was built of brick in 1938 with an attached garage [Photograph 31]. The Salomon house at 1789 East Hubbard Avenue is also transitional, built in 1939 with less steep gables and the characteristic nested entry gables of a period cottage [Photograph 32].

National Register of Historic Places Continuation Sheet

Section No. 7 Page 5

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Two of the three Yalecrest LDS churches were built in this era.⁴ The 1925 red brick Colonial Revival Yale LDS Ward Chapel at 1431 Gilmer Drive [Photograph 33] was designed by Taylor A. Woolley at Evans and Woolley and built by Gaskell Romney. Both Woolley and Romney were residents of Yalecrest. The Art Deco LDS Yalecrest Ward Chapel at 1035 South 1800 East [Photograph 34] was built in 1936 of exposed reinforced concrete.

Miller Park was given to the city in 1935 by Viele Miller in memory of her husband, Charles Lee Miller. The park follows the course of Red Butte Creek and its ravine, extending from 900 South southwesterly to 1500 East, is heavily wooded and has walking trails on either side of the creek, several foot bridges across the creek, and a small stone masonry bench at the northern end. Two of its sandstone ashlar benches and pillars are visible on the corner of 1500 East and Bonneview Drive. [Photograph 35]. A stone fireplace with a small area of lawn in the southern section of the park is used by neighborhood residents [Photograph 36]. The southern part of Miller Park is now known as Bonneville Glen and is part of the neighboring Bonneville LDS Ward Chapel and Stake Center property (see below). Miller Park is a contributing resource in the Yalecrest Historic District.

World War II and Postwar Growth (1940-1957)

The World War II and post-war growth period provided twenty percent of the principal contributing structures in the survey area; fifteen percent from the 1940s and five percent from the 1950s. House types encountered range from late period revival cottages and World War II Era cottages to early ranch and ranch house types in a range of wall cladding. Colonial Revival styles still continue to appear as the two-story brick side-gabled house at 1340 East Harvard Avenue [Photograph 37] was built in 1940. The 1955 brick early ranch at 1762 East Sunnyside Avenue is a transition between earlier period cottages and later ranches [Photograph 38]. An unusual contemporary or "modern" example is the stylish "butterfly" roof of the Donald B. & Ruth Ellison House built in 1953 at 1804 East Harvard Avenue [Photograph 39].

Postwar population growth of 40,000 in Salt Lake City spurred infill development in Yalecrest although there was no vacant land remaining for any additional subdivisions. The LDS Church acquired the southern half of Miller Park from the city and constructed the red brick postwar Colonial Revival style Bonneville Ward Chapel and Stake House in 1949 [Photograph 40]. The building was designed by Lorenzo S. Young and built by the Jacobsen Construction Company. In exchange the LDS Church gave the land that became Laird Park to the city. Now Laird Park provides a small green open area of lawn and playground bounded by Laird and Princeton Avenues and 1800 East [Photograph 41]. Its open space serves as a soccer field as well as a practice ball field. It is a contributing resource to the area.

A small commercial area developed in the postwar period at the intersection of 1700 East and 1300 South. In an example of adaptive reuse, a service station built in 1951 now serves as a restaurant at 1675 East 1300 South [Photograph 42]. It is a contributing resource. Across the street is an out-of-period 1961 service

⁴ The third church, the Bonneville LDS Ward Chapel and Stake Center, was built in 1949.

National Register of Historic Places Continuation Sheet

Section No. 7 Page 6

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

station, still serving its original purpose at 1709 East 1300 South [Photograph 43]. The two other commercial structures across 1300 South to the south are outside of the historic district.

1960s and Beyond (1958-2007)

The late-twentieth century buildings in Yalecrest are infill or replacement structures and constitute only two percent of the total buildings of the district. The Uintah Elementary School [Photograph 44] at 1571 East 1300 South was designed by VCBO Architects of Salt Lake City and constructed by Layton ICS in 1993, replacing the previous 1915 structure. It is not out-of-scale with the nearby houses with its two floors and its brick masonry walls reflect the most common wall cladding from the surrounding neighborhood.

Modern housing styles predominated in the early part of the era. A ranch/rambler with a projecting double car garage was built of brick in 1976 at 1836 East Sunnyside Avenue [Photograph 45]. A later frame shed-roofed c. 1990 house is set back from the road at 1384 East Yale Avenue [Photograph 46].

The construction of the house on 1788 East Hubbard Avenue in 2000 spurred neighborhood controversy by its out-of-scale massing and three car garage doors on the façade [Photograph 47]. It led to neighborhood activism through the community council and the eventual development of a new zoning ordinance⁵ to prevent the construction of more out-of-scale houses in the neighborhood. Another two-story twenty-first century replacement house can be seen in contrast to its single-story neighbors at 1174 East Laird Avenue [Photograph 48].

More recent replacement houses reflect a modern reworking of the predominant styling of the area with Neo-Tudor styling details such as the asymmetry, brick and stone cladding and steeply gabled roofs but with significantly larger massing than the surrounding houses. Examples can be seen at 1774 East Michigan Avenue under construction in 2007 [Photograph 49] and the 2004 example at 904 South Diestel Road [Photograph 50]. A substantial addition to a 1927 Dutch Colonial style house is under construction⁶ in a style similar to that of the original house at 1009 Military Way [Photograph 51].

Yalecrest remains a desirable residential area with mature street trees and well-maintained historic houses and yards. It has a significant concentration of historic houses, fifty-nine percent of which are period revival cottages, built by prominent architects and developers in subdivisions from the 1910s through the 1940s with some infill and development in the 1950s. Its historic houses retain their historic integrity to a remarkable degree, ninety-one percent (91%), and contribute to the historic association and feeling of the area.

⁵ Yalecrest Compatible Residential Infill Overlay Zoning Ordinance, Adopted by the Salt Lake City Council on July 12, 2005.

⁶ In the spring of 2007.

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Narrative Statement of Significance

The Yalecrest Historic District is located on the east bench of Salt Lake City, southeast of the business and downtown section. It is locally significant both architecturally and historically, under Criterion A for its association with the residential development of the east bench of Salt Lake City by real estate developers and builders in the first half of the twentieth century. Its tract period revival cottages and subdivisions of larger houses for the more well-to-do represent the boom and optimism of the 1920s and 1930s in Salt Lake City. The district is also significant under Criterion C for its intact architectural homogeneity. It was built out quickly with 22 subdivisions platted from 1910 to 1938 containing houses that reflect the popular styles of the era, largely period revival cottages in English Tudor and English Cottage styles. The architectural variety and concentration of period cottages found is unrivalled in the state. Examples from Yalecrest are used to illustrate period revival styles in the only statewide architectural style manual.⁸ The subdivisions were platted and built by the prominent architects and developers responsible for early twentieth century east side Salt Lake City development. It is associated with local real estate developers who shaped the patterns of growth of the east bench of Salt Lake City in the twentieth century. Yalecrest was initially and continues to be the residential area of choice for prominent men and women of the city. The district is locally renowned as the "Harvard-Yale area" and its streets lined with mature trees and historic houses are referenced in advertising for twenty-first century subdivisions elsewhere in the Salt Lake Valley.⁹ It is a remarkably visually cohesive area with uniform setbacks, historic houses of the same era with comparable massing and landscaping, streets lined with mature shade trees, and a surprising level of contributing buildings that retain their historic integrity. It contains a concentration of architecturally significant period revival cottages and bungalows designed by renowned architects and builders of Utah. The historic resources of the Yalecrest Historic District contribute to the history of the residential east bench development of Salt Lake City.

Historical Development of the Area (1849-1909)

Salt Lake City was a planned city, laid out in a grid according to the "Plat of the City of Zion," a town plan proposed by Joseph Smith, founder of the Church of Jesus Christ of the Latter-day Saints (Mormon or LDS), and later used for many Mormon settlements throughout the Utah territory. Within a year of the arrival of the first group of settlers in 1847, Salt Lake City had grown to 5,000 inhabitants. Public buildings were in the center of the city, surrounded by residential lots and farmland to the south and west. The Big Field Survey in 1848 divided the land to the south of the Salt Lake City settlement (900 South today) into five and ten-acre plots to be used for farming for the "mechanics and artisans" of the city.¹⁰ The Yalecrest Historic District is located on the northeastern section of land that was initially set apart as Five-Acre Plat "C" of the Big Field

⁸ Thomas Carter and Peter Goss. *Utah's Historic Architecture, 1847-1940*. Salt Lake City, UT: University of Utah. Graduate School of Architecture and Utah State Historical Society, 1991.

⁹ E.g. <http://www.daybreakutah.com/homes.htm>

¹⁰ The area north of 2100 South was Five-Acre Plat "A" and the area south was the Ten-Acre Plat.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 2

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Survey.¹¹ The land was divided into 100-acre blocks, each of which was again divided into 20 lots of 5 acres each. The Yalecrest Historic District occupies Blocks 28, 29, and 30 which are bordered by the major north-south streets of the survey area: 1300, 1500, 1700 and 1900 East and the east-west streets of 900 and 1300 South. The property was intended for agricultural use and was distributed by the LDS church authorities to the faithful by lot for use in raising crops and farming.

The earliest identified residents in the Yalecrest area begin to appear in the 1870s.¹² Gutliffe Beck had a ten-acre plot and his early 1870s adobe farmstead was located near the intersection of Yalecrest Avenue and 1700 East. The property was later used as a dairy farm. Paul Schettler's farm, situated near the intersection of 1900 East and Herbert Avenue, had crops that included silk worms and mulberry orchards. David Lawrence had twenty acres of alfalfa located to the south of the Schettlers. On Sunnyside between 1800 and 1900 East Jim Carrigan built a house c. 1876 and farmed forty-five acres. A one-legged man named Wheeler lived at what is now 1372 Harvard and got his culinary water from Red Butte Creek. No remnants of the earlier settlement homes are known to remain.

Historic Contexts

Streetcars, Subdivision Development and Automobiles (1910-1939)

Rapid population growth of Salt Lake City and streetcar access to the downtown area made the Yalecrest area attractive to subdivision developers in the early years of the twentieth century. The population of Salt Lake City increased at the turn of the century, almost doubling from 1900 to 1910, bringing about a need for more housing for the new inhabitants.¹³ Air pollution from coal-burning furnaces as well as growing industry in the valley created smoke-filled air in Salt Lake City. Properties on the east bench beyond the steep grade that flattens at 1300 East above the smoky air of the city became attractive for residential development. Land developers from Utah and out-of-state purchased land on the east bench and filed subdivision plats. Early subdivision advertising touted the clean air of the bench, above the smoke of the valley.

Pavement of some of the streets in Yalecrest occurred soon after construction of the first houses. The earliest street pavement project began with Yale Avenue from 1300 to 1500 East in 1913-1914. Developers usually provided the sidewalks, curbs and gutters as they began to lay out the subdivisions. The streets were paved by the city and funded through assessments of the adjacent properties.¹⁴ Most Yalecrest streets were paved in the 1920s with only a few following in the 1930s.

¹¹ The majority of Yalecrest with the exception of strips along the north and west sides is part of Five Acre Plat "C."

¹² All information on the 19th c. settlers is from the Daughters of Utah Pioneers, *Yale Camp Locality History* (1933), p.20.

¹³ 53,531 in 1900 and 92,777 in 1910.

¹⁴ E.g. Harvard Avenue from 1300 to 1500 East, Normandie Circle, and 1400 East from Harvard to Princeton were paved by a city contractor, Christenson, Jacob and Gardner, in 1926. The city paid \$772.31 and the adjacent parcels were assessed \$24,623.88. Today that construction would cost \$415,000.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 3

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Streetcars made the Yalecrest area easily accessible to downtown Salt Lake City. The lines serving the Yalecrest area traveled from downtown to 1300 East in front of East High, south along 900 South to 1500 East, then south to Sugar House and the prison. By 1923 there were 217 streetcars and over 100,000 passengers a day in Salt Lake City. By that same time, Salt Lake County had 21,000 private cars registered and garages became a popular addition to urban house lots. Ridership on the streetcars began to decline in the later 1920s in spite of a total of 152 miles of streetcar tracks in 1926. A trial gasoline powered bus¹⁵ began a route along 1300 East in 1933. Buses soon predominated in public transportation in the latter part of this era.

Subdivisions

The majority of the Yalecrest area was platted in subdivisions; 22 were recorded from 1911 to 1938.¹⁶ The first was Colonial Heights in the southeast corner of Yalecrest in January of 1911,¹⁷ but little was built there until the 1930s. The largest was Douglas Park, laid out across the northern section of Yalecrest¹⁸ later in 1911 by the W.E. Hubbard Investment Company. Hubbard was a medical doctor from Chicago who came to Utah via Los Angeles and became involved in real estate sales, investments and mining. He was active in real estate and by 1919 had platted, developed, and sold 41 subdivisions.

Douglas Park Amended and Douglas Park 2nd Addition comprise a total of 1,158 building lots in an area that includes the ravine surrounding Red Butte Creek and another gully that runs between Michigan and 900 South between 1300 and 1500 East. Initial development consisted of rather large, geographically dispersed bungalows on the western section, overlooking the city. Some of the earliest houses in the area are these scattered bungalows on 900 South, 1400 East and 1500 East. Construction of houses in the Douglas Parks took place over a forty year period from the teens through the early 1950s.

The Leo and Hallie Brandenburger House is an Arts and Crafts bungalow built in 1913 on the north side of 900 South with its lot steeply sloping at the rear into a wooded ravine. It was one of the first houses in the Douglas Park subdivision to be completed and the Brandenburgers had a view of the city to the west from their front porch. Leo Brandenburger arrived in Utah in 1904, the same year that he received his electrical engineering degree at the University of Missouri. He worked at the Telluride Power Company and Utah Power and Light Company before opening his own engineering office in the Louis Sullivan-designed Dooley Building (demolished) in downtown Salt Lake City in 1914.

Don Carlos Kimball and Claude Richards formed Kimball & Richards Land Merchants in 1908 to develop and sell land. They were responsible for over 30 subdivisions between 1900 and 1925. They served as developers as well as builders in Yalecrest. Gilmer Park was a creation of Kimball and Richards in 1919, and consists of 295 building lots, most of which lie outside of Yalecrest in the Gilmer Park National Register

¹⁵ The first in the nation to have the engine in the rear.

¹⁶ There were 439 subdivisions platted in Salt Lake City from 1906-1930. Aegerter, p. 29.

¹⁷ Fremont Heights dates from 1892 but the small portion of it within Yalecrest has only out-of-period buildings.

¹⁸ Roughly the area to the north of Michigan Avenue.

Historic District (listed 3/96) to the west. Thornton Avenue and Gilmer Drive between 1300 and 1400 South constitute the Yalecrest section of Gilmer Park.

The 1920s were a period of tremendous growth in Yalecrest with eleven subdivisions platted by a variety of developers. Upper Yale Park has curvilinear streets with large irregularly-shaped lots, many extending back to the wooded area of the Red Butte ravine and Miller Park. Houses built on the curving streets in Yalecrest have larger lots and tend to be larger scale than those set in the rectilinear grid streets. It was platted by Ashton and Jenkins in 1924.

The Bowers Investment Company, a branch of the Bowers Building Company, filed the subdivision papers for Normandie Heights in 1926. Normandie Heights was the last large (140 lots) subdivision to be platted in Yalecrest and its houses were built primarily from 1926-35. It is distinctive like Upper Yale Park because of its picturesque rolling topography with landscaped serpentine streets, regular newspaper promotions, prominent homeowners, deep setbacks, and large irregularly shaped lots. Much of the sales of its lots and houses were done by the firms of Kimball & Richards, Ashton-Jenkins, Gaddis Investment Company, and Le Grande Richards Realty Company.

Uintah Heights Addition consists of Laird Circle, Uintah Circle and Laird between 1400 and 1500 East and was registered in 1928. Houses were constructed there primarily in the late 1920s and early 1930s, many by Herrick and the Gaddis Investment Company.

The other subdivisions from the 1920s: Yalecrest Park, Upper Yale Addition, Upper Harvard, Upper Yale 2nd Addition, Upper Princeton, Harvard Park, and Upper Yale 3rd Addition have streets in a grid pattern. Four subdivisions were platted in the 1930s; Mayfair Park (1930) consists of two culs-de-sac and Hillside Park (1937) has the semi-circular Cornell Street. Upper Laird Park (1931) is both sides of one block of Laird Avenue. The last subdivision to be platted was Yalecrest Heights by Willard and Gwendolyn Ashton in 1938. After its plat was registered no significant vacant space was left in the Yalecrest area.

Architects

A number of prominent Utah architects designed houses and some also made their homes in the Yalecrest area: J.C. Craig designed the two-story Prairie house at 1327 S. Michigan c. 1915. Lorenzo S. Young who later designed the Bonneville LDS Ward Chapel and Stake Center in 1950 most likely designed his own house at 1608 E. Michigan c. 1935. Glen A. Finlayson built his unusual Art Deco house at 973 Diestal Road in 1936. He was a Utah native who worked as an architectural engineer for American Oil and Utah Oil for 33 years and lived in the house with his wife, Mina, until his death in 1969.

Slack Winburn designed the house at 979 South 1300 East in c. 1922. Winburn studied architecture at the Ecole des Beaux Arts et des Sciences Industrielles at Toulouse, France, following his service there in World War I. He moved to Salt Lake City in 1920 and was active designing many buildings in Utah and the Intermountain West including the Sigma Nu fraternity house and Bailif Hall at the University of Utah and a number of apartment buildings in Salt Lake City.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 5

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Fred J. Swaner drew the plans for and supervised the building of a fashionable clinker brick bungalow at 871 South 1400 East in 1915 for William R. Hailey who emigrated to Salt Lake City from Grafton, Nebraska, to work for the Hubbard Investment Company, owners of Douglas Park. Dan Weggeland was an architect employed by the Bowers Building Company and responsible for designing many of the houses and apartment buildings constructed by them, including those in Normandie Heights.

Raymond Ashton designed his own house at 1441 East Yale Avenue in addition to a number of other Yale Park houses as well as commercial and institutional buildings. The Jacobethan Irving School and Sprague Library in the Sugar House section of Salt Lake City show his facility with period revival styles. He also designed the Prairie Style bungalow at 1302 East Yale Avenue that was home to George Albert Smith, a President of the LDS Church [NR-listed, 3/93]. He was allied with the Ashton family businesses as well as the Ashton-Parry Company and Ashton and Evans, Architects.

The noted Utah architect, Walter Ware, designed a Tudor Revival house for Lee Charles and Minnie Viele Miller in 1929 at 1607 East Yalecrest Avenue. Walter Ware designed the First Presbyterian and the First Christian Science Churches among many other buildings in Salt Lake City during his long career from the 1890s to 1949.

The Frank Lloyd Wright-trained Utah architect, Taylor A. Woolley, most likely designed the Prairie style house at 1408 East Yale Avenue for William W. and Leda Rawlins Ray, the U.S. District Attorney for Utah as well as another Prairie School Style house at 1330 East Yale Avenue for his uncle, Albaroni H. Woolley, a manager for Zions Cooperative Mercantile Institution (ZCMI). Taylor Woolley was involved with both residential construction and one religious building in Yalecrest. The 1925 red brick Colonial Revival Yale LDS Ward Chapel at 1431 Gilmer Drive was designed by Taylor Woolley at Evans and Woolley and built by Gaskell Romney. Both Woolley and Romney were also residents of Yalecrest. Woolley was a major proponent of the Prairie School style of architecture in Utah.

Builders and Developers

Developers and builders played the primary role in the growth of Yalecrest. They laid out the potential lots, registered subdivisions with the county, arranged for sidewalks, curbs and gutters, arranged financing, involved real estate people, publicized the opening of the subdivisions in the newspapers, built speculative houses, frequently serving as contractors or builders for custom houses, and in many cases, lived in the subdivisions themselves. Most of the builders were active on numerous streets in the area.¹⁹

There are seventy-three developers and builders associated with the Yalecrest Historic District. The Ashton-Jenkins Company, one of the largest real estate and mortgage banking companies in Utah, recorded three subdivisions in the survey area: Yale Park in 1913, Yale Park Plat A in 1915 and Upper Yale Park in 1924. The Yale Parks were heavily promoted in the newspapers and attracted prominent homeowners. Several generations of the Ashton family were major developers in Salt Lake City and involved in real estate,

¹⁹ See Builders and Developers of Yalecrest appendix for their names and the names of the streets that they developed.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 6

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

development, construction, architecture and allied occupations. Edward T. Ashton and his brother George S. were sons of Edward Ashton, a cut stone contractor who supplied stone for many church and public buildings in Utah, and were partners in the firm of Ashton Brothers, contractors and builders, and later the Ashton Improvement Company. They were responsible for the construction of thousands of houses in Salt Lake City. Edward T.'s sons continued the family involvement with construction: Raymond J. was an architect, Marvin O. was manager of the Rio Grande Lumber Company, and Edward M. was a contractor.

Edward M. Ashton went into real estate by himself in 1900 but soon founded the realty firm of Ashton & Jenkins in 1905 with Edward Elmer Jenkins, a businessman involved in real estate and banking. The Ashton-Jenkins Company was also involved in real estate sales for the Normandie Heights subdivision. Edward M. Ashton lived in one of the earliest houses in Yalecrest, designed by his brother the architect, Raymond Ashton, and built by the Ashton Improvement Company, at 1352 East Yale Avenue in 1913.

Several families of builders and real estate people, like the Ashtons, were involved in Yalecrest. George C., Louis J. and Frank B. Bowers were brothers. The Bowers Brothers constructed over 3,000 buildings in Utah, Wyoming and Nevada by 1946. The builder Gaskell Romney was involved in developing Normandie Heights as well as building houses on speculation. He was active in Utah, Idaho and California and worked in Mexico before coming to Utah in 1921. G. Maurice Romney, his son, also did speculative building in the area. Gaskell Romney and his wife, Amy, lived in Yalecrest at 1442 and later at 1469 East Princeton Avenue.

Fred A. Sorenson, most likely of the Sorenson Building Company, built his own house c. 1927 at 1049 Military Drive. He worked as a builder from 1908 to only a few years before his death in 1988. J.A. Shaffer built several houses on speculation on Laird in 1927. He was briefly involved in Salt Lake real estate before moving to Indiana. H. (Henning) Henderson was born in Denmark in 1887 and worked as a building contractor in Salt Lake City from 1913 until his retirement in 1950. Albert Toronto was the owner and operator of Toronto & Company, a Salt Lake real estate, insurance, and home building firm. He was a Salt Lake native, educated in the local schools and active in building in the 1920s and 1930s. He built speculative houses in the Colonial Heights subdivision.

N.L. Herrick was a partner in the Gaddis Investment Company as well as an individual builder, active in the Upper Harvard and Uintah Heights Addition. Herrick and Company provided design as well as construction services. The Gaddis Investment Company was founded in 1922 to deal in real estate, investments and insurance. Both of its partners lived in Yalecrest; N.L. Herrick at 1603 East Harvard Avenue and Thomas E. Gaddis at 1465 East Laird Avenue in a French Norman house built in 1929. Thomas Gaddis was involved in real estate and investments in Salt Lake City from 1909 to his death in 1967.

Individual developers occasionally built the entire street of speculative houses. The district of small cottages, from 1500 to 1600 East on Princeton and Laird Avenues, was for the most part constructed by Samuel Campbell; Princeton in 1924 and Laird in 1925. Samuel Campbell worked as a contractor/builder in Salt Lake City from 1913 to 1930 and built more than sixty houses in Yalecrest. He built primarily on speculation frequently with financing from the Ashton-Jenkins Company. Many of the houses served as rentals to middle class tenants before being sold. The cottage district was not platted as part of a subdivision. Louis J.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 7

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Bowers is another example of a single builder constructing buildings along an entire street. He built all of the houses on Uintah Circle in the Mayfair Park subdivision (platted in 1930) on speculation in 1937 and 1938.

Sidney E. Mulcock both owned the property and built speculative houses in Upper Princeton. Mulcock built Duffin's Grocery Store in 1925 at 1604 East Princeton Avenue, run by Clarence Duffin in conjunction with the William Wood & Sons meat market. Duffin's was the only market within Yalecrest and was designed to have the same setback and blend in with the surrounding houses. It has since been modified for residential use and is now a noncontributing building [Photograph 11].

Alice Felkner was one of the few women involved in real estate in Yalecrest. She was prominent in Utah mining and industrial pursuits as well as owning the land that was platted as Upper Yale Addition and Upper Yale 2nd Addition in 1926 & 1927. She was born in 1854 in Indiana and moved to Idaho with her brother, William H. Felkner, in 1886 to engage in stock, mercantile and mining businesses. The siblings moved to Salt Lake City in 1909. At the time of her death in 1937 she was a director of the Consolidated Music Company, a large stockholder of the Silver King Coalition Mines Company, and director of several large mining companies. The Upper Yale Additions extend along the north and south sides of Yale and Herbert Avenues from 1700 East to 1800 East. Houses were constructed in the late 1920s and 1930s, primarily by Philip Biesinger, another Yalecrest builder and developer.

With the help of mortgages from Ashton-Jenkins and the Romney Lumber Company Philip Biesinger built a model house at 1757 East Herbert Avenue in 1927-8. The *Salt Lake Tribune* advertisement²⁰ noted that it is located in "the best residential section this city affords" and is built of "the finest of materials" and "presents a most imposing appearance." The names of the workmen and suppliers are proudly listed in the model home announcement as are the "electric sink" and "automatic refrigeration." The property did not immediately sell so Biesinger sold this property to the Romney Lumber Company who used it as a rental property until 1940. The Romney Lumber Company was involved in the construction and financing of a number of houses in the surrounding subdivision as well as a retail operation where they provided "roofing, cement, plaster, (and) wall board."²¹ Philip Biesinger was building on the surrounding lots on Herbert as well as Harvard, Yale and Yalecrest Avenues.

Residents

The subdivisions of Yalecrest were actively marketed by the real estate firms through the newspapers to prominent people. Early inhabitants of the Yalecrest area range from leading citizens active in politics, business, sports and religion to well-to-do professionals, particularly law and medicine, as well as those in middle class occupations.

The Utah Governor Charles R. Mabey lived in an Ashton and Evans English Cottage-style house at 1390 East Yale. He also served on the Bountiful City Council, as Mayor of Bountiful, and as a state legislator. William C. Ray was a Democratic candidate for the U. S. House of Representatives in 1912 and later was the

²⁰ *Salt Lake Tribune*, 9/23/28, 3-8.

²¹ 1932 Salt Lake City *Polk City Directory*.

Section No. 8 Page 8

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

U.S. District Attorney. He lived in a Prairie School-style house at 1408 East Yale with his wife, Leda Rawlins Ray. Wallace F. Bennett owned a 1923 Prairie School-style house at 1412 East Yale Avenue that had been previously owned by David D. Crawford of the Crawford Furniture Company. Bennett served in the U. S. Senate from 1950 to 1974.

Two presidents of the Mormon Church lived in Yalecrest. All of the individual governors of the United States in 1947 visited the home of the then President of the Mormon Church, George Albert Smith, at 1302 East Yale Avenue. The Prairie School style bungalow was built for Isaac A. Hancock who was vice-president of a Utah fruit and vegetable company by Raymond Ashton in 1919. Ezra Taft Benson served under President Eisenhower as the Secretary of Agriculture before becoming the president of the LDS Church. He lived in the French Norman style house at 1389 East Harvard Avenue that was built for Richard Leo Bird, the founder of an outdoor advertising agency.

Many business owners were residents of Yalecrest. John and Bertha Barnes bought the Tudor style cottage at 1785 East Yalecrest Avenue in 1929 and lived there until 1940. John Barnes was the owner and operator of Crown Cleaning and Dyeing Company (NR listed 7/2003) from 1922 to 1962. He was also president of the National Association of Dry Cleaners and the Sugar House Chamber of Commerce. Bryant Crawford and his wife, Carrie Day, purchased 1757 East Herbert Avenue in 1940. He was the president of Crawford and Day Home Furnishings. Lee Charles Miller ran the Miller and Viele Loan Company, first with his father-in-law, then by himself. The firm was the largest farm mortgage company in the intermountain west. He specialized in farm loans and financed a number of irrigation systems and reservoirs in southern Utah. After his death in 1930 Mrs. Miller donated property in his memory along both sides of Red Butte Creek to the city where it became known as Miller Park. Mrs. Miller raised and bred prize-winning Hampshire sheep and Guernsey cattle on her ranch on the Snake River in Idaho. The Millers lived at 1607 East Yalecrest Avenue in a Tudor Revival style house.

The 1930 U.S. Census of Population provides a snapshot of other occupants of the Yalecrest Historic District. The typical residents were often business proprietors or with managerial or professional careers, native born, and owned their own homes. Marie Morrison was a grocery store owner and a widow raising two children by herself at 1437 East 1300 South. Her neighbors on the street were also home owners. Roland Standish owned an advertising agency and lived at 1457 East 1300 South with his wife, Bertha, and their four daughters. Jacob Madsen and his wife, Mary, were immigrants from Denmark and lived with their two grown children at 1463 East 1300 South. Jacob and Mary owned a farm out of state and Sarah and Ilta were a stenographer and grade school teacher, respectively. Other occupations on the street were safety engineer, pharmacist, musician, and newspaper compositor.

Several generations shared the Willey house at 1455 East Gilmer. David was an attorney, his son, David Jr. was a salesman for a paint company, and two daughters, Dorothy and Katherine, were a stenographer and a clerk. Three grandchildren, a daughter-in-law and mother complete the family resident in the house. Several neighbors had servants, not uncommon in the area. Occupations of residents on the street ranged from coal mine operator, food and drug inspector, automobile salesman, mining and electrical engineers, sales manager for a furniture company, hotel proprietor and a son who worked as a gas station attendant.

National Register of Historic Places Continuation Sheet

Section No. 8 Page 9

Yalecrest Historic District, Salt Lake City, Salt Lake County, UT

Two brothers lived next door to each other at 1403 and 1411 East Michigan Avenue. Joshua Summerhays was a hide and wool merchant who had four children with his wife, Mary. Their eldest daughter, Virginia, was a public school teacher as was her uncle, John, next door at 1411. John and LaPrella had four children ranging in age from 1 to 8 years old. The Summerhays' neighbors had a variety of occupations which included two engineers, electrical and mining, two stock & bond salesmen, a coal mine inspector, a linotype operator, a manager of a storage company and a sales engineer of steel structures.

An optometrist, a medical doctor, a dentist and an apiarist (beekeeper) lived as neighbors on 900 South. Dr. Byron and Mabel Rees lived at 1382 East 900 South with their three children, Ralph, Lone and Afton, and

Ellen Bybrosky, their Danish servant. Hubert Shaw installed mining equipment for a living and lived with his wife, Edith, at their house at 1434 East 900 South. J.C. Wilson worked in religious education and lived with his wife, Melina, and their four children at 1466 East 900 South.

Leslie Pickering was a general building contractor and lived with his wife, Mina, and daughter, Beverly, at 1464 East Michigan Avenue. He is not known to have constructed any buildings in the Yalecrest area. Pinsk, Russia, was the birthplace of Simon Weiss who worked as a clothing salesman after coming to this country as a child in 1903. His wife, Claire, and daughter, Betty, were both born in Utah. The Weiss family owned their home at 1363 Thornton Avenue. Fred B. and Hazel Provol were early tenants at the model house on 1757 East Herbert Avenue. Fred Provol was secretary-treasurer of the Hudson Bay Fur Company ("furs, coats, dresses, lingerie and costume jewelry") in the 1930s.

A school, two LDS churches, and a park were built to accommodate the population moving into the area. Uintah School was constructed in 1915 to support the growing elementary school age population of the East Bench. It was built encircled by vacant land but soon was filled to capacity with the rapid growth of the surrounding residential sections. The school was enlarged in 1927. Two LDS ward chapels were built in this era. Taylor Woolley's firm designed the 1925 red brick Colonial Revival Yale LDS Ward Chapel at 1431 Gilmer Drive. The Art Deco Yalecrest Ward Chapel at 1035 South 1800 East was built in 1936 of exposed reinforced concrete. Miller Park (discussed above) follows the course of Red Butte Creek on both sides of its ravine and originally extended from 900 South to 1500 East.

World War II and Postwar Growth (1940-1957)

The emergence of the defense industry in the Salt Lake valley in the early 1940s and the return of the GIs after the war caused a great need for housing. The population of Salt Lake City grew by 40,000. The FHA (Federal Housing Administration) estimated at the time that Salt Lake City needed 6,000 more housing units to meet the postwar demand. The district most likely reflects the building trends in Salt Lake in this era. New houses were built on the few vacant lots at Yalecrest and many homeowners took out building permits to finish basement or attic space for more room or to rent out as apartments. Donald and Ruth Ellison purchased their modern house at 1804 East Harvard Avenue soon after it was constructed in 1952. The following year they were living in the house while Donald Ellison was the claims manager for the Intern Hospital Service.

Mass-transit vehicles transitioned from streetcars to buses, but in general began to be supplanted by the widespread use of private cars. By 1940 the 1500 East streetcar was gone and city buses served Yalecrest traveling along 1300, 1500 and 1700 East as well as 900 and 1300 South. Houses began to be designed with attached garages, rather than a separate garage at the rear of the lot.

The growth of the LDS population after the war required the construction of a third facility. A land swap gave the southern section of what was Miller Park to the LDS Church in 1945 in exchange for property that became Laird Park, located on 1800 East between Laird and Princeton. Land that was previously the southern section of Miller Park was used for construction of the Bonneville LDS Ward Chapel and Stake Center. Its red brick Postwar Colonial Revival style building was designed by Lorenzo S. Young and constructed by the Jacobsen Construction Company in 1949. Bonneview Drive was constructed by the church as a private road to provide access to the building but was later made a public street.

The few remaining vacant lots and streets on existing subdivisions were filled in during this era. For example, although the Hillside Park subdivision was registered in 1937 by the Anderson Lumber Company, an active builder in Yalecrest, initial construction didn't begin until 1939 and continued into the 1940s.

1960s and Beyond (1958-2007)

This era was a time of stability for the neighborhood. The Yalecrest area avoided the blight common in many urban neighborhoods during this era and remained a desirable residential area. There was no population pressure in the early part of the period as the population of Salt Lake City actually decreased fourteen percent between 1960 and 1980.²² No major roads were built through the neighborhood although traffic increased on the border streets of 1300 South, 1300 East and Sunnyside Avenue. A service station was built at 877 South 1300 East c. 1970 to aid the automobile traffic. The original 1915 Uintah Elementary School was demolished and replaced by a new structure in 1993.

The Monster House phenomena surfaced in the Yalecrest neighborhood and mobilized the inhabitants. They worked through their community council to create the Yalecrest Compatible Residential Infill Overlay Zoning Ordinance which was adopted by the City Council on July 12, 2005. Their residents took a leading role in presenting the concepts to the Salt Lake City Council and a city-wide ordinance followed in December of 2005, based on the efforts of the Yalecrest group.

Rising gasoline prices have made living near jobs in the city more attractive, reducing commuting time. As people desire to move from the suburbs back into the city, many want large suburban houses on small city lots. Even with the restrictions of the recent zoning ordinances, the district remains threatened by the trend to larger and larger residences, through demolition of the historic house and out-of-scale replacements or obtrusive additions to existing buildings.

²² 189,454 in the 1960 U.S. Census, 163,000 in 1980 and back up to 181,743 in 2000.

Summary

The Yalecrest neighborhood has mature street trees, well-maintained historic houses with landscaped yards and continues to be a desirable residential area, known throughout the valley as the Harvard-Yale area, and serves as an aspirational model for new subdivisions. The residential buildings within the Yalecrest Historic District represent the styles and types of housing popular in Utah between 1910 and 1957, with the majority built in the 1920s. Because it was developed within a short period of time by prominent developers and architects, the area has a remarkably high degree of architectural consistency and is highly cohesive visually. The collection of period revival styles both of the smaller period revival cottages in the gridiron streets as well as the larger houses on the more serpentine streets is a significant historic resource for Salt Lake City. The variety of period revival and bungalow styles found are literally textbook examples and, in fact, illustrate Spanish Colonial Revival, French Norman, and Prairie School styles in the state architectural history guide. The few noncontributing properties are scattered throughout the district and do not affect the ability of the district to convey a sense of significance. The area retains a remarkable degree of historic integrity.
